

air**RAP** pot

1.

1. Take the base and position on lower ridge of the airRAP pot wall. Make sure the closed 'spikes' (no holes) are at the top.

2.

2. Fold the pot around the base (the cone of the base should point upward in to the pot) until the outer walls meet. The last row of spikes on the outer wall fit inside one another.

3.

3. Take the screws and position in place. The bigger the pot, the more screws you'll have.

4.

4. Your airRap pot should now look like this. Screws on the outside.

"Award Winning Products made in England and 5 star rated service."
