**Root Veg Planter – Perfect for Buried Treasure**  
**No gluts, rotting or variety boredom**

**New for the Edible Garden Show**

A great new British-designed and made planter launched at the Edible Garden Show promises bumper harvests of buried treasure. The new [Root Veg Planter](#) has space for 4 varieties, a clever design that prevents water-logging and tuber rot and even holiday-proofs your spuds.

Many gardeners will have pulled up at least one or two dreaded foul-smelling rotten potatoes. The Root Veg Planter prevents the water-logging which causes most tuber rot. The planter's Feeder Mats pull water up from the SmartReservoir to the plants when they need it, keeping them perfectly fed and watered without ever water-logging the soil, so there's no risk of rotten soggy spuds and you raise bigger harvests of better tasting spuds.

The Root Veg Planter's SmartReservoir holds 30 Litres, plenty to keep plants perfectly fed and watered for up to two weeks at a time, so there's no need for holiday-watering rotas.

The Root Veg Planter's 4 pot design also prevents the gluts familiar to anyone using other potato planters. Simply plant and harvest the varieties you want, when you want – instead of having to harvest 60 potatoes at a time! This way all of your home-grown spuds can be enjoyed fresh.

The seed for the idea of the Root Veg Planter was sown when the [Greenhouse Sensation](#) team were harvesting potatoes at their office allotments and came across a few rotten ones. They decided to speak to foodies and gardeners to identify everything that was frustrating about growing potatoes and then they set out to develop a perfect potato planter.

Each pot holds 18 Litres of compost.

Made from very durable recycled plastic, use year after year.

**Root Veg Planter - 4 varieties in a 60 x 60 cm space**

**Harvest 36 - 72 potatoes!**

### **About Greenhouse Sensation**

Greenhouse Sensation is a retailer and manufacturer of 'brilliant gardening products'. The company designed the award-winning [Vitopod Propagator](#), [Grow planters](#) and [Click & Drip irrigation kits](#), all of which are made by Greenhouse Sensation's own team in England.

For 2012 Greenhouse Sensation has carefully selected products designed by other companies to be featured in its catalogue and on its website, making the website and brochure an essential destination for gardeners.

All products available on the Greenhouse Sensation website are extensively trialled in the company's greenhouses and polytunnels in Lancashire, where we also grow bananas. Greenhouse Sensation products are made in England from recycled material.
