

Mulch Cap & Cane Support

Contents

1 x Support tray with cane supports:

1 x Tank cover:

4 x Mulch Caps:

Instructions

1. Set up your Quadgrow as normal but replace the standard support tray with your new support tray with cane supports.
2. Plant your plants as normal but place a mulch cap over each Quadgrow pot after planting. Slide the central hole of the mulch cap gently over your plant so as not to damage any leaves.
3. You will now be able to slide a cane through the cane support in the mulch cap and the cane support in the support tray. (If your Quadgrow is positioned on soil you can achieve greater support by pushing your cane into the soil).
